

Ved Keshattiwar - 10827380

Experience Summary

- IT Experience: Software Engineer (8 months in LTIMindtree)
- Experienced in understanding high-quality project requirements, development and execution, documentation, and client collaboration
- Experience in Core Java, Java EE, and MVC frameworks like Spring Boot, Angular,Python, PySpark
- Proficient in ORM frameworks like Hibernate and SpringData JPA
- Hands-on experience with Spring RESTful Webservices, Microservices.
- Familiar with Agile Methodology and CI/CD pipelines
- Exposure to PySpark Data Analytics, and Visualization Tools

Skills Summary

Domain	Banking and Finance
Programming Languages	Java, Python, PySpark, SQL, HTML, CSS, TypeScript, JavaScript
Operating System / ERP Version	Windows
Tools / DB / Packages / Framework / ERP Components	Core Java, Spring Boot, Angular, Hibernate, PostgreSQL, MySQL, Power BI, Jupyter, JSON, Tomcat, Apache ActiveMQ, Spring Boot Actuator, Maven, GitHub, ThunderClient, PostMan, Postgres, MySql, JDBC, Swagger.

Professional Certifications/ Trainings

Completed in-house Java Full Stack training (Spring Boot and Angular) with capstone project "Farm Aid"

Oracle Certified Professional: Java SE 11 Developer(OCP)

Work Experience

Project – LTIMindtree, Mumbai

Project Name	Movie Booking System	Team Size	1
Start Date	Dec 2024	End Date	Jan 2025
Project Description	A web-based Movie booking platform designed to allow users to search, book, and manage Movie reservations. Admins can manage Movie Bookings, Pricing, and availability, while users can browse bookings, make bookings, and view their movie booking history. The system ensures secure access and smooth user experience through role-based functionalities and real-time validations.		
Role & Contribution	1. Developed RESTful APIs for movie booking, and user management using Spring Boot 2. Implemented role-based access control for admins and customers 3. Built Angular components for booking search, booking workflows, and user dashboards 4. Integrated JWT-based authentication and authorization for secure access Enabled CRUD operations for movie bookings, and user profiles Added validations for seat availability, booking limits, and movie dates . 5. Integrated a real-time fraud detection pipeline into the movie booking module, leveraging PySpark Structured Streaming and Apache Kafka to monitor and identify suspicious credit card transactions during booking. Detected anomalies were stored in local storage for alerting and further analysis, significantly enhancing the security and trustworthiness of the platform		
Technology &Tools	Core Java, Spring Boot, Spring JPA, Spring MVC, Maven, Tomcat, MySQL, Angular, HTML, CSS, TypeScript, Postman, GitHub, Python ,PySpark		

Project 2 – LTIMindtree, Mumbai

Project Name	Citi Ops Portal	Team Size	5
Start Date	June 2025	End Date	July 2025
Project Description	- Doing the development of Citibank’s internal onboarding/offboarding portal. - Upgraded Angular to v19, refactored to standalone modules, and improved UI/UX. - Collaborated with teams to deliver scalable and maintainable solutions.		
Role & Contribution	- Led UI/UX Revamp: Upgraded Angular framework to v19, refactored legacy code into standalone modules, improving performance and maintainability. - Feature Development: Designed and implemented core features for employee onboarding and offboarding workflows, ensuring seamless integration with backend services. - Collaboration & Agile Delivery: Worked closely with cross-functional teams (backend, QA, product) to deliver scalable and maintainable solutions in an Agile environment. - Code Quality & Optimization: Refactored components for better reusability, reduced load times, and enhanced user experience across the portal.		
Technology &Tools	Angular 19, Spring Boot, Java, JPA, Microservices, MySQL, Tomcat		

Project 3 – LTIMindtree, Mumbai

Project Name	Internal Training - The Product Manager	Team Size	5
Start Date	April 2025	End Date	June 2025
Project Description	Developed a unified workspace integrating multiple microservices to streamline product operations. The system includes: • Monitors system health using Spring Actuator • Listens to messages via Apache ActiveMQ • Handles backend logic and sends messages • Angular-based frontend for user interaction All services are launched together using a single .bat file for simplified orchestration.		
Role & Contribution	1. Developed backend services using Spring Boot and integrated Apache ActiveMQ for messaging 2. Built frontend components using Angular for seamless user experience 3. Configured Spring Actuator for real-time monitoring and health checks 4. Automated multi-service startup using batch scripting 5. Ensured modular and scalable architecture across services 6. Collaborated with team to ensure smooth integration and deployment		
Technology &Tools	Java, Spring Boot (Backend), JPA , Angular (Frontend), PostgreSQL (Database), Maven, Microservices, Github, Tomcat, Spring Actuator, Apache ActiveMQ (Messaging), Batch Scripts		

Project 4 – LTIMindtree, Mumbai

Project Name	Orchard Training Capstone Project – Farm Aid	Team Size	6
Start Date	Feb 2025	End Date	March 2025
Project Description	• Built a web platform for farmer loan applications with admin loan approval logic. • Integrated user dashboard and document validation. • Built a web platform for farmer loan applications and approval workflows.		
Role & Contribution	1. Designed and implemented backend services using Spring Boot and MySQL 2. Developed responsive frontend interfaces using Angular 3. Integrated role-based access for Admin, Customer modules 4. Implemented RESTful APIs for seamless communication between frontend and backend 5. Applied modular architecture for scalability and maintainability 6. Conducted unit testing and debugging to ensure code quality and performance 7. Collaborated in Agile environment with regular sprint reviews and code walkthroughs		
Technology &Tools	Java, Spring Boot (Backend), JPA , Angular (Frontend), PostgreSQL (Database), Maven, Microservices, Github, Tomcat		

Educational Qualification

Education & Credentials	B.Tech (Information Technology) from Vishwakarma Institute of Information Technology, Pune in 2024.
